In many industries, it is important to know the length of time a machine or equipment has been used. The purpose is to cut down production cost by checking the operating hours of machines,
Kaycee Time Totalizers tell you when Lubrication, Overhaul. Adjustment or Replacement of component is due on Machine Tools, Industrial Machinery, and Test Equipment or complete Processing Systems..
Kaycee Time Totalizer incorporates a self-starting synchronous movement ensuring accurate summation of ON TIME of any circuit fed from an AC Supply. Each time the machine is switched on, the Totalizer records the running time of that machine directly on the straight reading dial to read either in hours or minutes down to tenths.

All models of Time Totalizer are suitable for flush panel mounting.
